This moratorium is for the company's ten taxable years beginning the first full taxable year after it first qualifies and ending either ten years from that year or the year when the taxpayer's number of full-time jobs falls below one hundred, whichever is earlier. The moratorium applies to the portion of the company's corporate income tax that represents the ratio that the company's new investment in that moratorium county is of its total investments in this State. If a taxpayer creates and maintains at least two hundred new full-time jobs within five years from the date the taxpayer creates the first new full time job at the facility, then the moratorium period is extended to 15 taxable years, beginning the first full taxable year after the taxpayer qualifies and ending either 15 years from that year or the year when the taxpayer's number of full-time new jobs falls below 200, whichever is earlier.
